GHG Verification Statement

Introduction

Korean Foundation for Quality (hereinafter 'KFQ') has been engaged by Samsung SDI Co., Ltd.(hereinafter the 'Company') to independently verify its 2016 Greenhouse Gas Emission Report of domestic corporations and 9 overseas subsidiaries.

It is the responsibility of the Company to compile the Greenhouse Gas Emission Report according to the 'Greenhouse Gas and Energy Target Management Scheme (Notification No. 2014-186 of Ministry of Environment),"Guidelines for GHG emission reporting and certification of GHG emission trading scheme (Notification No. 2016-15 of Ministry of Strategy and Finance) ', and 'ISO 14064-1:2006', and KFQ has responsibility to conduct verification based on the ISO 14064-3 to provide verification opinion on compliance of the Report against verification criteria.

Verification Scope

In this verification, domestic corporations and 9 overseas subsidiaries under operational control of Samsung SDI Co., Ltd., and reported emission in including Scope 1(Direct) and Scope 2(Indirect) emission. Scope 3(Indirect-business trip and logistics) is also considered in total Greenhouse Gas Emission.

Verification Opinion

Through the verification process according to the ISO 14064-3, KFQ could obtain reasonable basis to express following conclusion on the Greenhouse Gas Emission Report.

(1) 2016 Samsung SDI Co., Ltd., Greenhouse Gas Emission Report was prepared against "Greenhouse gas and energy target management scheme'. 'Guidelines for emission reporting and certification of greenhouse gas emission trading scheme, and ISO 14064-1:2006:

- (2) As a result of materiality assessment on 2016 domestic Greenhouse Gas Emission(Scope 1 and Scope 2), material discrepancy is less than the criteria of 5% for the organization who emits less than 500,000tCO₂e/yr in accordance with the requirements of the 'Guidelines of verification for Greenhouse gas emission trading scheme':
- (3) For the 9 overseas subsidiaries, material assessment was conducted according to the document review result and it shows that material discrepancy is less than 5.0%.
- (4) Among reported Greenhouse Gas Emission purchased electricity and LNG consumption take most of total emission. Activity data of these emission sources were checked through the objective evidence provided by supplier therefore KFQ could confirm that these activity data is valid itself

For the overseas subsidiaries, national net caloric value and electricity emission factor were preferentially used but net caloric value in 'Greenhouse Gas and Energy Target Management Scheme' was used in case of nonexistence of it.

For the Scope 3 of the domestic corporation, its emission was calculated according to the Company methodology considering travel distance for business trip only by objective evidence. And for the factors considered in emission calculation, the latest factor was used thus consistency and correctiveness is substained in 2016 Greenhouse Gas Emission Report against Samsung SDI Co., Ltd., internal guideline.

(5) Except unconsidered emission source in the 'Samsung SDI Co., Ltd., Greenhouse Gas Inventory Guideline', material error, omission or insignificant issues was not founded in 2016 Samsung SDI Co., Ltd., Greenhouse Gas Emission Report.

[2016 Samsung SDI Co., Ltd., Greenhouse Gas Emission]

Third-party Verification Statement

LRQA Independent Assurance Statement

Relating to Samsung SDI Co., Ltd.'s Sustainability Report for the 2016 calendar year

This Assurance Statement has been prepared for Samsung SDI Co., Ltd. in accordance with our contract but is intended for the readers of this Report.

Terms of engagement

Lloyd's Register Quality Assurance (LRQA) was commissioned by Samsung SDI Co., Ltd. (Samsung SDI) to provide independent assurance on its 'Samsung SDI Sustainability Report 2016' ("the report") against the assurance criteria below to a moderate level of assurance using AA1000AS (2008), where the scope was a Type 2 engagement.

Our assurance engagement covered Samsung SDI's operations and activities in Korea and overseas specifically the following requirements:

- Evaluating adherence to AA1000 AccountAbility Principles of Inclusivity, Materiality and Responsiveness
- Confirming that the report is in accordance with:
 - GRI G4's1 reporting guidelines Core option
- Evaluating the accuracy and reliability of data and information for only the selected indicators listed below:
 - Economic: economic performance (EC1), market presence (EC5, EC6), procurement practices (EC9)
 - Environmental: energy (EN3, EN5, EN6), emissions (EN15, EN16, EN17, EN18, EN19, EN20), effluents and waste (EN23), compliance (EN29), supplier environmental assessment (EN32, EN33), environmental grievance mechanisms (EN34)
 - Social: employment (LA1, LA2, LA3), labor/management relations (LA4), occupational health and safety (LA5, LA6, LA8), training and education (LA9, LA10, LA11), supplier assessment for labor practices (LA14, LA15), labor practices grievance mechanisms (LA16), non-discrimination (HR3), supplier human rights assessment (HR10, HR11), human rights grievance mechanisms (HR12), anti-corruption (SO3, SO4, SO5), compliance (SO8), supplier assessment for impacts on society (SO9, SO10), grievance mechanisms for impacts on society (SO11), customer health and safety (PR1, PR2), product and service labelling (PR5)

Our assurance engagement excluded the data and information of Samsung SDI's suppliers, contractors and any third-parties mentioned in the report.

LRQA's responsibility is only to Samsung SDI. LRQA disclaims any liability or responsibility to others as explained in the end footnote. Samsung SDI's responsibility is for collecting, aggregating, analysing and presenting all the data and information within the report and for maintaining effective internal controls over the systems from which the report is derived. Ultimately, the report has been approved by, and remains the responsibility of Samsung SDI.

LRQA's Opinion

Based on LRQA's approach nothing has come to our attention that would cause us to believe that Samsung SDI has not, in all material respects:

- Met the requirements above
- Disclosed accurate and reliable performance data and information as all errors or omissions identified during the assurance engagement were corrected
- Covered all the issues that are important to the stakeholders and readers of this report.

The opinion expressed is formed on the basis of a moderate level of assurance and at the materiality of the professional judgement of the verifier.

Note: The extent of evidence-gathering for a moderate assurance engagement is less than for a high assurance engagement. Moderate assurance engagements focus on aggregated data rather than physically checking source data at sites. Consequently, the level of assurance obtained in a moderate assurance engagement is substantially lower than the assurance that would have been obtained had a high assurance engagement been performed.

LRQA's approach

LRQA's assurance engagements are carried out in accordance with our verification procedure. The following tasks though were undertaken as part of the evidence gathering process for this assurance engagement:

- Assessing Samsung SDI's approach to stakeholder engagement to confirm that issues raised by stakeholders were captured correctly.
 We did this through reviewing documents and associated records.
- Reviewing Samsung SDI's process for identifying and determining material issues to confirm that the right issues were included in their Report. We did this by benchmarking reports written by Samsung SDI and its peers to ensure that sector specific issues were included for comparability. We also tested the filters used in determining material issues to evaluate whether Samsung SDI makes informed business decisions that may create opportunities that contribute towards sustainable development.
- Auditing Samsung SDI's data management systems to confirm that
 there were no significant errors, omissions or mis-statements in the
 report. We did this by reviewing the effectiveness of data handling
 procedures, instructions and systems, including those for internal verification. We also spoke with those key people responsible for compiling the data and drafting the report.
- Reviewing supporting evidence made available by Samsung SDI at their head office in Gyeonggi-do and Cheonan production site in Chungcheongnam-do, Korea.

This document is subject to the provision on page 2.

¹ https://www.globalreporting.org

04 APPENDIX

• Checking the report boundary covers all sites in Korea and overseas presented in the overview of the report.

02 High Material Issue 2016

• Checking that the GRI Content Index allows stakeholders to access sustainability indicators.

Observations

Further observations and findings, made during the assurance engagement, are:

- Stakeholder inclusivity:
 - We are not aware of any key stakeholder groups that have been excluded from Samsung SDI's stakeholder engagement process.
- Materiality:

We are not aware of any material issues concerning Samsung SDI's sustainability performance that have been excluded from the report. It should be noted that Samsung SDI has established extensive criteria for determining which issue/aspect is material and that these criteria are not biased to the company's management. However, Samsung SDI should improve the materiality process by ensuring that the results from stakeholder engagement in place at overseas operations are reviewed and reflected when Samsung SDI defines material issues centrally.

• Responsiveness:

Samsung SDI has reported its sustainability performance in Korea and overseas in the report. Some data sets and information do not include some or all of the overseas operations and Samsung SDI has annotated these in the report if the geographical boundary is different. However, Samsung SDI should strengthen processes so that when there are organizational changes such as mergers and acquisitions, the reporting boundary captures these accordingly.

Reliability: Samsung SDI has reliable data management systems.

LRQA's standards, competence and independence

LRQA implements and maintains a comprehensive management system that meets accreditation requirements for ISO/IEC 17021 Conformity assessment – Requirements for bodies providing audit and certification of management systems that are at least as demanding as the requirements of the International Standard on Quality Control 1 and comply with the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants.

LRQA ensures the selection of appropriately qualified individuals based on their qualifications, training and experience. The outcome of all verification and certification assessments is then internally reviewed by senior management to ensure that the approach applied is rigorous and transparent.

LRQA is Samsung SDI's certification body for ISO 9001 and ISO/TS 16949. We also provide Samsung SDI with a range of training services related to management systems. The verification and certification assessments, together with the training, are the only work undertaken by LRQA for Samsung SDI and as such does not compromise our independence or impartiality.

UN SDGs (United Nations Sustainable Development Goals)

UN established promoted Millennium Development Goals (MDG) for the period during 2000~2015. On September 2015, UN adopted Sustainable Development Goals (SDG) to build sustainable societies around the world and on its way to purse this goal during 2016~2030.

Samsung SDI, as a global corporation, agrees with UN SDG's direction that address the universal agenda and analyzed our sustainable activities relevant to the pursuit and detailed goals of UN SDG and presented them on each page.

- 1. End poverty in all its forms everywhere
- 2. End hunger, achieve food security and improved nutrition and promote sustainable agriculture
- 3. Ensure healthy lives and promote well-being for all at all ages
- 4. Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all
- 5. Achieve gender equality and empower all women and girls
- 6. Ensure availability and sustainable management of water and sanitation for all
- 7. Ensure access to affordable, reliable, sustainable and modern energy for all
- Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all
- Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation
- 10. Reduce inequality within and among countries

- 11. Make cities and human settlements inclusive, safe, resilient and sustainable
- 12. Ensure sustainable consumption and production patterns
- 13. Take urgent action to combat climate change and its impacts*
- 14. Conserve and sustainably use the oceans, seas and marine resources for sustainable development
- 15. Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss
- 16. Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels
- 17. Strengthen the means of implementation and revitalize the global partnership for sustainable development

04 APPENDIX

Sustainability Report in Previous Years
